Summary

Motivated and detail-oriented Software Engineering student with a strong foundation in front-end development. Proficient in building responsive and user-friendly applications using React.js and Flutter. Experienced in state management and API integration, with a solid understanding of modern web technologies and design principles. Fluent in Arabic and English, with conversational skills in Turkish. Passionate about continuous learning and applying innovative solutions in software development.

Education

Bachelor of Science in Software Engineering

Damascus University — Damascus, Syria

Expected Graduation: 2026

Skills

- **Languages:** JavaScript, TypeScript, HTML5, CSS3, Dart
- **Frameworks & Libraries:** React.js, Next.js, Flutter, Redux Toolkit, TanStack Query, React Query, React Hook Form, React Router
- **Styling & UI:** Tailwind CSS, Bootstrap, MUI (Material-UI), Ant Design, Shadcn/ui, Radix UI
- **Tools & Platforms:** Git (GitHub, GitLab), Vite, Jira, ClickUp, Figma, Axios, Pusher
- **Concepts:** State Management, RESTful APIs, Responsive Design, Internationalization (i18n), Agile Methodology, Clean Code Architecture

Projects

Umbra - Visitor Management System | React TypeScript Redux Tailwind

- **2025** | A comprehensive, real-world project for a university entrepreneurship center.
- **Challenge:** The center needed a system for event management, visitor tracking, and security using IoT devices.
- **Solution & Contribution:**
 - Conducted stakeholder requirements analysis and designed the system architecture.
 - Developed the front-end using **React 18, TypeScript, and Vite**.
 - Implemented complex state management with **Redux Toolkit** and server-state with **TanStack Query**.
 - Built a modern UI with **Tailwind CSS** and **Shadcn/ui**.
 - Integrated real-time features using **Pusher** and managed forms with **React Hook Form** and **Zod**.
- **Outcome:** A production-ready system designed for deployment at the Digit Innovation Center.

Real-World Application Training (React.js)

Advanced E-Commerce Platform | React 19 TypeScript Zustand TanStack Query

- **2025** | A full-featured, modern e-commerce application built with cutting-edge React patterns.
- **Technical Implementation:**
 - Developed using React 19, TypeScript, and Vite for a type-safe and high-performance foundation.
 - Implemented a sophisticated feature-based architecture for superior scalability and maintainability.
 - Managed complex global state (cart, wishlist, auth) using Zustand and server state with TanStack Query for optimal performance and caching.

- Built a responsive UI with Tailwind CSS and Material-UI, featuring a complete user flow: product catalog, search, cart, wishlist, and checkout.
 - Engineered advanced features like debounced real-time search, flash sales with countdowns, and form handling with React Hook Form and Yup validation.
- **Outcome:** A production-grade e-commerce solution showcasing mastery of modern frontend architecture and user experience design.
- **Food Order App** | React Context API useReducer
 - Built a dynamic food ordering interface with a managed cart state using React's **Context API** and **useReducer**.
- **Weather Website** | React Axios React Router
 - Created an interactive application fetching and displaying real-time weather data from an API.
- **Notes App** | React Vite Tailwind CSS
 - Developed a responsive CRUD application with search functionality and persistent local storage.

Landing Pages & E-Commerce

- **Jewelry E-Commerce Website** | HTML CSS JavaScript
 - Designed and developed a fully functional, responsive e-commerce site from scratch.
- **Dwello - Real Estate** | HTML Tailwind CSS JavaScript Swiper.js
 - Built a modern, responsive landing page with property search filters and an interactive carousel.
- **Hosting Company Landing Page** | Bootstrap JavaScript Swiper.js
 - Developed a professional site featuring a dynamic pricing toggle and hero slider.
- **Travel Website** | Bootstrap JavaScript
 - Implemented a multi-language and theme-switching interface.

Mobile Development (Flutter)

- **Reserva Project** | Flutter Block State Management Google Maps

- Developed a reservation system integrating Google Maps and notifications.
 - **Medicine Warehouse Project | Flutter HTTP Integration**
 - Built a mobile app for inventory management with a focus on user-friendly data handling.
-

Experience

Front-End Developer Intern | IXCoders

Oct 2025 - Present

Frontend Developer Intern | Sanad Youth

Aug 2025 - Present

- Develop and maintain modern web applications using **React.js** and **Next.js**.
- Build responsive and aesthetically pleasing interfaces with **Tailwind CSS** and **MUI**.
- Implement efficient state management solutions using **Zustand** and **TanStack Query (React Query)** for complex application data and server-state synchronization.
- Practice clean code architecture and project structuring principles for scalable and maintainable codebases.
- Utilize **Git** for version control in a collaborative Agile team environment.
- Contribute to the full development lifecycle, from concept to deployment and hosting.

Freelance Frontend Developer | Self-Employed

Sep 2024 - Present

- Worked with various clients to build and deploy custom web applications.
- Managed project timelines and deliverables independently.

IT Support and Data Entry | Tarkiq AI Mostakbal Company

*Jun 2025 - Aug 2025

- Provided technical IT support for courses and performed accurate data entry for course material management.
-

Certifications

- Enterprise Tech Unveiled
-

Languages

- **Arabic** (Native)
 - **English** (Professional Working Proficiency)
 - **Turkish** (Elementary Proficiency)
-
