-

Projects

Featured Web Projects

Government Complaints Management Dashboard *React 19, TypeScript, TanStack Query, Zustand, i18n, Recharts*

- Built a feature-rich administrative dashboard with role-based access control and multilingual support (AR/EN).
- Developed visual analytics and KPIs using Recharts to track system activity and complaint statuses.

Umbra – Visitor Management System *React.js, TypeScript, Redux, Tailwind CSS, Pusher*

- Developed a real-time university visitor tracking system featuring IoT integration and event management.
- Implemented live updates using Pusher to enhance data accuracy and user experience.

Advanced E-Commerce Platform *React 19, TypeScript, Zustand, TanStack Query, Tailwind CSS*

- Designed a high-performance solution with real-time search and a secure checkout flow.
 - Focused on a mobile-first, responsive UI utilizing ShadCN and modern design principles.
-

Featured Mobile Projects

Reserva – Reservation System *Flutter, Bloc, Google Maps API*

- Developed a mobile booking app integrating Google Maps for location selection and automated push notifications.

Medicine Warehouse Management *Flutter, HTTP Integration, REST API*

- Built an inventory tracking application with optimized data handling for efficient warehouse operations.
-

Experience

Front-End Developer Intern | IXCoders *(Oct 2025 – Present)* **Frontend Developer Intern** | Sanad Youth *(Aug 2025 – Present)*

Freelance Frontend Developer | Self-Employed *(Sep 2024 – Present)*

- Developing web applications using React.js and Next.js.
- Collaborating in agile environments using Jira and ClickUp for project management.

IT Support & Data Entry | Tarkiq Al Mostakbal Company *(Jun 2025 – Aug 2025)*

Languages & Certifications

- **Languages:** Arabic (Native), English (Professional), Turkish (Elementary)
- **Certification:** Enterprise Tech Unveiled
